

## **Tricia Taylor – Understanding Colour**

### **Workshop Description:**

Can you never find quite the right green? Does colour mixing in pastel baffle you? As artists, colour is our world. It can be very difficult in pastels to find just the right one. This workshop will be packed with information and exercises to teach you the fundamentals of colour especially in the landscape.

You will learn:

- Identify tone, temperature and intensity of colour.
- Create your own colour wheel and understand how it works for you.
- Mix any colour you want from a simple step process.
- Use pastel paper choice to control colour.
- Play with underpainting to enhance colour.

Understanding Colour: Suitable for beginners and experienced.

Day 1 – How to mix colour in Pastel. Starting at the beginning and getting a grasp of tone, temperature and intensity.

Day 2 – Mixing Green – how to use paper colour and mixing pastels to create amazing landscapes. Also understanding aerial perspective and how to achieve it in pastel.

Day 3 – project day – a time to use one of the techniques shown in the previous days and create your own project piece.
